Dear Parents/Guardians

CPRHealth Training, is proud to be able to provide your children with the opportunity to participate in a CPR HELP Safety Awareness Program. Our aim is to educate young children from Years 3 – Years 6 with basic techniques for First Aid and CPR. The children will gain knowledge of the DRSABCD Management Procedures (Danger, Response, Send for Help, Airway, Breathing, CPR, Defibrillator).

The program is fun and interactive incorporating role plays and hands on activities around the process of looking for danger, making the emergency phone call zero, zero, zero “000”, the recovery position, checking for breathing and clearing an airway. Students will also experience hands on techniques using manikins that will involve compressions and breathing.

By teaching your children these principles we are giving them the knowledge to stay safe and help in an emergency situation involving family or friends. Research has shown that “…children who learn the DRSABCD concepts at a young age are better equipped to deal with an emergency situation and have a greater grasp on these vital skills as a teenager and adults…” Australian Resuscitation Council

Just knowing how to put somebody into the recovery position and call 000 could save their life.

Give your child a skill for life … remember practice makes perfect!

CPR HELP will be at your school in:
Thursday 29th & Friday 30th May 2014
Duration 1 ½ hours
Cost $12.00
What to Wear Sports Uniform

(All children will take home their practice face mask, a special CPR HELP participation award and fun sheet).

On the day children will also have the opportunity to purchase a mini backpack, containing a genuine face mask and rubber glove set.
Special Student Price - $5.00 (cash only)

Please return the permission note and money by Friday 23 May 2014

Students Name _________________________ Class: ____________   Parent Signature: _____________________

If your child has any medical condition that could affect the involvement of their participation eg: Allergies, Asthma, Heart Condition, Epilepsy, Diabetes, please advise.

Condition: _________________________ Precaution: _________________________
